## SUMMARY

---

Full stack software engineer building and shipping production web and mobile products end to end. Sole engineer behind a React Native product that reached 100K+ downloads in 18 days and 63K+ monthly active users, owning frontend, backend, cloud infrastructure, releases, monetization, and production operations. Experienced with React, React Native, Next.js, TypeScript, Firebase, Google Cloud, and utilizing AI for efficient development.

## EXPERIENCE

---

### Full Stack React Native Developer — Growth Chain LLC

Full-time · June 2025 – Present · Sole engineer, working directly with the founder/product owner

- Built and shipped the product from scratch for iOS and Android, owning features, architecture, backend, cloud infrastructure, releases, store submissions, production fixes, and maintenance, reached 100K+ downloads in 18 days and 63K+ monthly active users.
- Owned the backend and cloud stack with Firebase, Firestore, Cloud Functions, Google Cloud, App Check, Remote Config, Analytics, push notifications, storage, backups, migrations, and query/file optimizations, moved privileged writes into Cloud Functions to improve security, consistency, and prevent race conditions and duplicate calls.
- Built the ad monetization system with AdMob mediation, added 9 additional ad networks, curated mediation groups, implemented ad retry/fallback and consent flows, increasing ad revenue by 4x.
- Implemented RevenueCat subscriptions, including offerings, entitlements, regional pricing, subscriber perks, purchase/restore handling, and customer billing issues and refunds.
- Built the Next.js admin dashboard for managing users, feeds, announcements, in-app events, notifications, and operational workflows without an app deployment.
- Managed production releases and reliability through EAS, staged rollouts, Remote Config, monitoring, crash reporting, and rollback procedures, utilized AI for faster feature development, debugging, refactoring, security improvements, and cost optimization.

### Software Solutions Specialist — The Riviere Group LLC

Part-time · May 2025 – Oct 2025

Built React/Next.js web interfaces and maintained client WordPress sites, debugging PHP/WordPress issues and using AI tools to improve delivery and troubleshooting.

### Full Stack Developer Intern — Lamina Studios LLC

Internship · Feb 2025 – May 2025

Contributed to a Smart Logistics System using Laravel and Vue.js, including a registration portal, customizable landing page, SEO improvements, and QR-code functionality.
